Finest quality for 40 years  
has built the largest sales in  
North America.

### The Imperial Economic Conference

The Imperial Economic Conference, shortly to be convened at Ottawa, is unquestionably one of the most important, perhaps ever called in the history of the British Empire. In fact it may easily prove to be one of the most important in the economic history of the whole world, because, whatever decisions it may reach will affect not only the British Commonwealth of Nations, but all nations.

There will be assembled together all the leading governing statesmen of the Empire, supported by the strongest possible groups of financial, economic, commercial and other experts that the Old Country can send. The Dominion governments can gather together. For months past these statesmen and experts, assisted by small armies of lesser experts and advisers, have been compiling and studying trade and monetary statistics, weighing the effect of this and that, probing as never before into the productive capacities, primary and industrial, of their countries, the natural resources, the state of employment, the requirements of their respective populations, the probable and possible trend of future developments and the extent thereof, and the effect of existing policies and possible future policies upon all these matters which enter into national and Empire growth, prosperity and strength.

And the object of it all is to evolve, if possible, new policies acceptable to all parts of the Empire, and which will prove of mutual advantage to all, and having as their objective the encouragement and development of a larger volume of inter-Empire trade. This means that the possibilities and the requirements of each part of the Empire must be ascertained, must be appreciated by all the other parts, and the whole dovetailed together to the advantage not only of each component part, but of the whole.

It becomes at once self-evident, therefore, that one of the major tasks confronting the Conference will be to find ways and means of removing existing barriers to the free exchange of commodities between one part of the Empire and other parts, to the mutual advantage of both, and without, in the process, working injury to any part. While the Old Country representatives, and the representatives of each of the Dominions must, of necessity, give particular heed to the interests of their respective nations, it is essential to the success of the Conference that this be done in no narrow, selfish spirit, but in such a way that while benefitting their own country they likewise confer benefits on the sister nations.

This does not mean that the spirit of approach to the intricate problems calling for solution should be one of making sacrifices; rather it should be in the direction of striving for mutual advantages. In fact the word "sacrifice" should be entirely absent from the Conference, while the term "mutual advantage" should be very much to the fore. In a word, the dominating ideal should not be that expressed in such slogans as "Britain First," "Canada First," "Australia First," but, on the contrary, it should be an adaptation of the motto of the Three Musketeers, "All for One, and One for All."

Along with the removal of existing barriers, and a mutual understanding or agreement that no new barriers will be erected, there must naturally develop policies designed to make ever easier the flow of trade into and out of all parts of the Empire to all other parts. This may involve the ultimate creation of a new system or method of monetary exchange, even an Empire currency. It would seem to be essential that some system be developed whereby the currency of any one part of the Empire should always be on a par with the currency of all other parts. In a word, that the same monetary standard should apply at all times throughout the Empire, and that, for example, at no time should the Canadian dollar be at a discount with the British pound, or vice versa. The guarantee of such a standard would undoubtedly be of tremendous assistance in establishing and maintaining inter-Empire trade at a maximum, removing, as it would, much of the uncertainty and loss which now prevails.

If the forthcoming Conference can achieve a measure of success along these and other lines having the same general object in view, the beneficial effect upon all parts of the British Empire will be almost incalculable. Not only so, but no other trading nations could afford to ignore such a development. The breaking down of trade barriers within the Empire would quickly force the breaking down of trade barriers by all other nations. It would be the beginning of a reversal of the suicidal policy into which the world has drifted and which has resulted in an almost complete paralysis, or destruction, of international trade and commerce, ending in the present state of world depression, unemployment, suffering and hardship.

Canadians may well be proud if, from their national capital, there is evolved a new economic policy for the Empire and the world. That this should emerge from the Conference should be, and we believe is, the fervent desire and hope of the Canadian people irrespective of any minor political differences of adherence to special schools of economic or fiscal thought.

#### Perils of the Air

##### Great Risk in Aviation Even in Short Flights

Well, Miss Earhart may certainly claim to have known the world what a woman can do. She is the only woman who has flown over the Atlantic alone. It was a splendid achievement of skill, courage, and endurance. Women throughout the world may quite excusably exult. But there will be no point in doing it again. The risks of aviation, even in short flights, were only too tragically illustrated on the very day of Miss Earhart's arrival. A competitor in the Morning Post's cross-country air race was killed, and at Budapest M. George Andreu, who flew across the Atlantic last year, ended his life in a crash. A photographer and his pilot who went to Ireland to photograph Miss Earhart were killed on their homeward journey—Manchester Guardian.

There are two kinds of people: Those who aren't hateful by nature, and those who speed up when somebody toots to pass.

The man who says the right thing at the right time is rare. But not half so rare as the man who says nothing at the right time.

A German scientist states that loss of 40 to 50 hairs from the head in a day is the "normal" limit.

## Pains in Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Montreal, N.B., writes:—"I can certainly recommend Dr. Fowler's Cat-Of-Strawberry for cramps or pains in the stomach and bowels. Last Summer I had such awful pains in my stomach, that I never part of my bowels, and I would have to sit down. I took Dr. Fowler's and was soon relieved. When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

#### Island Prison For Dookhobors

D'Arcy Island, Near Victoria, B.C. To Become Place Of Detention For Dookhobors. D'Arcy Island, about 20 miles from Victoria in Haro Strait, will become the home of some 200 Dookhobor men, sentenced to serve three years each for nudist parading.

Announcement of the creation of the island prison settlement was made by Oscar Bess, deputy attorney-general, on receipt of announcement from Ottawa of the decision. The Dominion government will almost immediately commence erection of such additional buildings and other accommodations as may be required.

The Dookhobors will be provided with agricultural implements so that they will be able to raise food-stuffs for their own maintenance.

D'Arcy Island was the site of a leper colony many years ago, but it has been closely inspected by medical officials, and has been given a clean bill of health.

It is understood that the Dookhobor women arrested, also numbering some 300, will be placed in a number of Dominion institutions in eastern Canada.

A total of 594 adults have been arrested. Three hundred and fifty-nine children will be cared for in various British Columbia institutions. This total of 953 persons, men, women and children, are affected by the action of the Dominion and British Columbia governments in their efforts to establish peace in the portion of the interior of the province in which the Sons of Freedom sect of Dookhobors have lived. The countryside there has been in a state of unrest for years, with nude parades, burning and bombings and consequent menace to life and property.

Prof. J. R. Watts, M.A., D.D., of Queen's University, Kingston, who is to make a rural survey of Census Division 11, Manitoba, for the United Church's Home Mission Board this summer, already Professor Watts has made surveys in Ontario and Nova Scotia, looking to a start of a rural life program.

#### FOR RURAL SETTLEMENT

### NEURITIS HAS GONE!

"I had acute neuritis in the shoulder and left arm, due to exposure in bad weather," writes the Rev. H. E. T. "I was unable to lift the arm to dress or to use it in any way, and, of course, the pain was dreadful. All I got to do was to lie in bed, and keep the parts affected warm and taking really early in the morning. Kruschen's was a tumbler of hot water. It took nearly a month, but every vestige of neuritis has gone."

Neuritis is typical of a dozen other complaints—some minor, some very serious—which all result from impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes these excruciating pains.

Kruschen Salt can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to purify your internal organs, to back into a healthy, normal condition.

#### Earth Upheaval

### Contour of Island in Bering Sea Is Changed

An isolated Bering sea island, populated only by a herd of immense musk oxen and great flocks of birds, Dogielof, has given Father Bernard R. Hubbard what he declares to be proof of how volcanic islands "grow."

A great steaming mound of lava, he said in a message sent to Seward, has been pushed out of the earth and has changed the contour of one section of the island completely. The mass is apparently increasing in size.

The "growth" is taking place, the Santa Clara University professor messaged, at a place where formerly a sheltered harbor existed.

His observations were made on a voyage from Bristol Bay with his party on the motorship "Polar Bear." Despite storms and high seas, a successful landing was made.

### Study Polar Phenomena

Saskatoon Professor To Be Member Of Party To Be Located At Chesterfield Inlet

In the special study of polar phenomena to be conducted in 1932 and 1933, in which over 100 meteorological stations will take part, Saskatchewan will have a special representative in the party of four to be located for a year at Chesterfield Inlet in the northwestern corner of Hudson Bay.

Dr. Balfour Currie, professor of physics of the University of Saskatchewan, will be a member of the party, which is under the direction of Frank Davies, at one time an instructor in physics at the University at Saskatoon. Mr. Davies was a member of the Byrd Antarctic Expedition and spent a year making weather observations there. He is well known in Saskatoon and was married here last summer.

### No Fool-Proof Rule

Mushroom Hunter Must Depend On His Own Judgment

The public's desire for a fool-proof rule by which to distinguish an edible mushroom from a poisonous one is doomed to unfulfillment, Dr. Fred Seaver, curator of the New York Botanical Gardens, said in a lecture at New York.

"One must learn to know the mushrooms and to distinguish them as you would your friends from your enemies," Dr. Seaver said that to the mycologist, or student of fungi, there was no such thing as terms "toadstool" and "mushroom."

"A mushroom is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

### Sell Seed On Certificate

Canadian Seed Growers Find Good Market In Great Britain

A statement just issued by Geo. H. Clark, Dominion Seed Commissioner, is of special interest because it shows that Canadian seed growers disposed of nearly 3,000,000 pounds of clover and a similar amount of alfalfa seed from the 1931 crop in the British market. He points out particularly that seed trade contracts in Canada are generally based on official grades while seed trade contracts with other countries are based mainly on actual samples. The advantage to the Canadian exporter is substantial when he can quote prices and receive offers by cablegram on the basis of seed certificate.

### Badly Taken In

A man was persuaded by a dealer to give several guineas for a far which he was assured, was of great value.

The collector showed his prize to a connoisseur friend, who examined it thoughtfully.

"How much did he rook you for it?"

"Seven guineas."

"Well, well! And he didn't throw in the marmalade!"

### New Wall Covering

New York Manufacturers Showing Special Linoleums

Introduction of a wide range of D-gauge linoleums suitable for use as wall coverings in kitchens, bathrooms and in other parts of the home is a feature of the seasonal offering by leading manufacturers of hard-surface floor coverings products. More than a year ago the use of linoleum as a wall covering material was suggested by a leading mill which made special displays of sample rooms, but the plan was not followed up by the trade. This year, however, leading producers are trying to increase their business volume by promoting the additional line.

### Slightly Mixed

The president of a certain university was preaching on "Faith," and in declaratory mood, told his auditory, "You have blind faith in the physician. He gives you medicine and tells you to take it. 'Yours not to reason why, yours to do and die!' Almost equal to this is the story of the man who solemnly assured his congregation that 'Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth.'"

### Received Knighthood

An interesting sequel to the unveiling of the memorial to Queen Alexandra came with the summoning of Alfred Gilbert, veteran sculptor who designed the monument, to Buckingham Palace, where the King conferred upon him the honor of Knighthood. Sir Alfred Gilbert as he now is, is 77 years of age.

### New Wall Covering

New York Manufacturers Showing Special Linoleums

Introduction of a wide range of D-gauge linoleums suitable for use as wall coverings in kitchens, bathrooms and in other parts of the home is a feature of the seasonal offering by leading manufacturers of hard-surface floor coverings products. More than a year ago the use of linoleum as a wall covering material was suggested by a leading mill which made special displays of sample rooms, but the plan was not followed up by the trade. This year, however, leading producers are trying to increase their business volume by promoting the additional line.

### Slightly Mixed

The president of a certain university was preaching on "Faith," and in declaratory mood, told his auditory, "You have blind faith in the physician. He gives you medicine and tells you to take it. 'Yours not to reason why, yours to do and die!' Almost equal to this is the story of the man who solemnly assured his congregation that 'Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth.'"

### Received Knighthood

An interesting sequel to the unveiling of the memorial to Queen Alexandra came with the summoning of Alfred Gilbert, veteran sculptor who designed the monument, to Buckingham Palace, where the King conferred upon him the honor of Knighthood. Sir Alfred Gilbert as he now is, is 77 years of age.

#### Earth Upheaval

### Contour of Island in Bering Sea Is Changed

An isolated Bering sea island, populated only by a herd of immense musk oxen and great flocks of birds, Dogielof, has given Father Bernard R. Hubbard what he declares to be proof of how volcanic islands "grow."

A great steaming mound of lava, he said in a message sent to Seward, has been pushed out of the earth and has changed the contour of one section of the island completely. The mass is apparently increasing in size.

The "growth" is taking place, the Santa Clara University professor messaged, at a place where formerly a sheltered harbor existed.

His observations were made on a voyage from Bristol Bay with his party on the motorship "Polar Bear." Despite storms and high seas, a successful landing was made.

### Study Polar Phenomena

Saskatoon Professor To Be Member Of Party To Be Located At Chesterfield Inlet

In the special study of polar phenomena to be conducted in 1932 and 1933, in which over 100 meteorological stations will take part, Saskatchewan will have a special representative in the party of four to be located for a year at Chesterfield Inlet in the northwestern corner of Hudson Bay.

Dr. Balfour Currie, professor of physics of the University of Saskatchewan, will be a member of the party, which is under the direction of Frank Davies, at one time an instructor in physics at the University at Saskatoon. Mr. Davies was a member of the Byrd Antarctic Expedition and spent a year making weather observations there. He is well known in Saskatoon and was married here last summer.

### No Fool-Proof Rule

Mushroom Hunter Must Depend On His Own Judgment

The public's desire for a fool-proof rule by which to distinguish an edible mushroom from a poisonous one is doomed to unfulfillment, Dr. Fred Seaver, curator of the New York Botanical Gardens, said in a lecture at New York.

"One must learn to know the mushrooms and to distinguish them as you would your friends from your enemies," Dr. Seaver said that to the mycologist, or student of fungi, there was no such thing as terms "toadstool" and "mushroom."

"A mushroom is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

### Sell Seed On Certificate

Canadian Seed Growers Find Good Market In Great Britain

A statement just issued by Geo. H. Clark, Dominion Seed Commissioner, is of special interest because it shows that Canadian seed growers disposed of nearly 3,000,000 pounds of clover and a similar amount of alfalfa seed from the 1931 crop in the British market. He points out particularly that seed trade contracts in Canada are generally based on official grades while seed trade contracts with other countries are based mainly on actual samples. The advantage to the Canadian exporter is substantial when he can quote prices and receive offers by cablegram on the basis of seed certificate.

### Badly Taken In

A man was persuaded by a dealer to give several guineas for a far which he was assured, was of great value.

The collector showed his prize to a connoisseur friend, who examined it thoughtfully.

"How much did he rook you for it?"

"Seven guineas."

"Well, well! And he didn't throw in the marmalade!"

### New Wall Covering

New York Manufacturers Showing Special Linoleums

Introduction of a wide range of D-gauge linoleums suitable for use as wall coverings in kitchens, bathrooms and in other parts of the home is a feature of the seasonal offering by leading manufacturers of hard-surface floor coverings products. More than a year ago the use of linoleum as a wall covering material was suggested by a leading mill which made special displays of sample rooms, but the plan was not followed up by the trade. This year, however, leading producers are trying to increase their business volume by promoting the additional line.

### Slightly Mixed

## Disarmament Responsibility For Its Ultimate Solution Rests Primarily With the Great Powers

Disarmament was a political problem and the responsibility for its solution rested primarily with the great powers, Sir George Perley, declared at Ottawa, Sir George, who headed the Canadian delegation to the Geneva disarmament conference, was addressing a joint gathering of the Ottawa branch of the League of Nations Society, the National Council of Women, the Women's Canadian Club of Ottawa, and the Canadian Club of Ottawa.

Efforts towards that end, he stated, had been initiated and carried on at Geneva by private conversations among the representatives of the various chief countries. Many things had occurred to interfere with and prevent the success of the recent deliberations. There were the elections in France; the illness of Premier Ramsay MacDonald; the necessity of United States Secretary of State Stimson returning to his country; the precarious position of the then German Chancellor Herr Brüning which had only recently resulted in his resignation. Much had been done in spite of circumstances, Sir George said in voting his belief in the work of disarmament and the League of Nations.

A most important resolution on qualitative disarmament had been passed at the Geneva gathering by unanimous vote to the effect that any armaments which were found to be either aggressive in character or particularly dangerous to the civilian population should be removed from national control.

The technical work of the conference was still progressing, Sir George stated, and political conversations would be resumed later when it was hoped conditions would be more propitious for further progress towards the objective which all so greatly desired.

"Education and not emotionalism must be the broad, fundamental basis for the development of international good will leading to permanent peace and to disarmament," declared Miss Winnifred Kydd, Montreal, president of the National Council of Women of Canada, and one of Canada's three delegates to the conference.

Miss Kydd dealt with the preliminary work of the Conference sub-committee on moral disarmament of which she was a member, having as its object an intense study of how the public opinion of all countries of the world may be mobilized in the interests of peace. The moral disarmament committee, Miss Kydd indicated, intends to utilize the press, the radio and the moving picture in its peace propaganda work.

Referring to the presentation of the petition for world disarmament at the conference, Miss Kydd stated that the Canadian petition, bearing 500,000 names, was given a prominent place when the petitions from all countries were placed on display.

### Interesting Discovery By Archaeologist

#### Finds Another Secret Passage in Old Palestine City

Sir Flinders Petrie, the veteran archaeologist who has unearthed so many of the secrets of the past, is still actively excavating at Old Gaza, the great city of Palestine which was well known to Abraham. The latest announcement in connection with his work is the discovery of another secret passage leading from the city out into the desert. A great tunnel, leading under the walls and nearly 500 yards out into the desert, was found last year, and constitutes but one of the many features of the fortified city which military experts do not yet fully understand. Sir Flinders estimates that it will take another 50 years to excavate the area yet to be explored.

#### Funds Quite Safe

Business was over for the day and the two partners had adjourned for a game of snooker in a nearby hall. As the evening was nearing its end and they were preparing to go home, one of them clapped his hand against his brow and emitted a shrill scream.

"We're ruined! We're ruined!" he shrieked. "I just remember that I left the safe door open when we closed the shop."

"Oh, that's all right," replied his business mate easily. "We're both here, ain't we?"

Helpless Diver: "Funny, I have the feeling that I have forgotten something!"—Muske, Vienna.

W. N. U. 1947

### Making Final Test

#### Rest-Resistant Varieties Of Wheat Being Tried Out

For the purpose of considering and advising upon the solution of urgent problems of agriculture in all the major divisions of Canada—the Maritimes, Quebec and Ontario, the Prairies and British Columbia—the newly-formed national advisory committee on agriculture of the National Research Council met in Ottawa.

Dr. H. M. Tory, president of the council, stressed the need of co-operation and co-ordination in working out national problems.

Dr. Robert Newton, acting director of the division of biology and agriculture, recounted the enormous progress made in the last decade, through research organizations working in co-operation.

He stated that rest-resistant varieties of wheat from all the agencies which developed them have been pooled for final test. Those selected are being tried out at numerous points, and the resulting grain is to be studied by laboratories of the Dominion Department of Agriculture and the three provincial universities in the west.

The grain research committee since its inception has undertaken several major special investigations. Dr. Newton said there was now in press the final report on the investigation of the drying of grain "which should clear up all points likely to arise."

Numerous complaints regarding the effect of the combine method of harvesting on grain have resulted in the inauguration of an elaborate investigation.

### Norfolk Fishermen Are Superstitious

#### Claim Weather-Vane Depicting Crow Brings Bad Luck

Mariners are notoriously superstitious. The local governing council of Crofton, the aggressive little township on the Norfolk coast, is respecting the superstition of the local fishermen in regard to a weather-vane depicting a large crow which was erected recently by the council. The fishermen say the weather has been consistently bad since the vane was put up, and they have not been able to catch so many crabs and lobsters. The crow, they assert, is "a bird of ill-omen," and an emblem of death.

In deference to these representations the vane is to be taken down, and a new one depicting a ship in full sail, is to be set up.

### Scottish Market For Cattle

#### Good Prices Are Obtained For Cattle Shipment From Saskatchewan

Higher prices than anticipated have been realized on the first shipment of Saskatchewan cattle to Scotland, according to a report received by the Department of Agriculture from G. B. Johnson, Canadian Trade Commissioner at Glasgow.

The Scottish market offers a good demand for choice steers, weighing from 10 to 11 hundred weight, capable of being made into prime beef with three or four months' fattening, according to Mr. Johnson. The market absorbs many of this type between April and July, in the spring season, and from September to December, in the autumn.

### Grow Fat and Laugh

#### According To London Doctor Laugh Comes Second

Having believed for so long in the advice, "Laugh and grow fat," we must change our ideas according to a London doctor, who finds that the growing fat precedes the laughter.

From his study of children he has found that fat babies are the happiest, good temper runs in families and girls have better tempers than boys.

So there goes by the board that other belief that the fat man is good-tempered because he is too stout either to quarrel or run away. He just can't help his happiness and serenity.

### Will Use Rubber Bayonets

Sixteen hundred rubber bayonets, exact replicas of those used by British troops in a battle with Russian infantry on the slopes of Inkerman in October, 1854, are being manufactured by a British firm for use in a Crimean fighting scene which will be part of "The Aldershot Tattoo," to be staged at Rushmore Arena. The bayonets are said to look exactly like the real thing with their silver-grey blades and black handles.

### An Old Kitchen Utensil

Chinese cooks have been at it for a long time. Dr. Berthold Laufer, curator of archaeology, brought to the Field Museum, Chicago, from China, a display of pre-historic double boilers, similar to those used by modern housewives, but made of clay, which were used by the Chinese some 4,000 years ago.

Indo-China expects a bumper rice crop.

### Refitting Old Vessel

#### Clipper Ship Built In 1876 With Sail Sails Again

The day of wooden ships and iron men has not yet gone by.

The bark "Coriolanus," once "Queen of the Jute Clippers," has sailed for Bath, Me., to be fitted out in the same powerful square rig in which she established a sailing record between London and Calcutta years ago.

Refitted, she then full rigged clipper ship will sail out of Boston to again engage in trade with Africa.

She has sailed under six flags over the seven seas. Her prow has churned waters of the Arctic and the tropics and she has survived hurricanes and fire at sea to become a part of the old New England clipper ships still in service.

A syndicate headed by C. Nelson Rogers of Boston recently purchased her and she will return to that port immediately after her new spars have stepped into place at the Bath Iron Works, Bath, Me. At Boston she will take on a cargo for a trading voyage to Africa.

She was built at Dumbarton, Scotland, in 1876, and was awarded a gold medal by the Honorable Shipwrights' Guild of London for the most beautiful lines of any clipper ship then afloat.

The "Coriolanus" established a record of 69 days between London and Calcutta and the record has never been lowered by a sailing ship.

In recent years she has engaged in the packet trade between New Bedford and the Cape Verde Islands.

### Forge Crop Regulations

#### Rule Governing Production Of Registered Seed To Apply

Regulations governing the production of registered seed in future will apply to forage crops, delegates to the annual convention of the Canadian Seed Growers' Association decided. A complete set of rules, for immediate use, was adopted at the meeting held in Winnipeg.

Notice given in the recommendations mention approved methods of designating strains of forage crops, progress in the registration of corn and red clover, and recognition of strains and specified types within varieties of forage crops.

### Cost Of Horse Labor

#### Records Show Cost Of Work Horse At Six Cents Per Hour

The Superintendent of the Federal Experimental Station at Indian Head, Sask., has provided some interesting and timely information about the seasonal cost of work horses under prairie conditions.

From the records kept in connection with seven head of the average sized fed for the season of active farm operation was \$22.15, while the average number of hours worked was 1,849, which represents a work value, on the basis of 6 cents per hour, of \$13.08.

### Standardized Automobile Insurance

#### New Plan Comes Into Effect In Ontario This Year

Standardization of automobile insurance policy forms becomes effective in Ontario September 1, the provincial insurance department announces.

The insured motorist will be automatically responsible to his victims under the new regulations. The standard form says that every company shall be liable to the victim of an accident under all circumstances. If the policy holder has violated the statute, the company must seek redress against him.

### Forced Down By Storm

It doesn't rain "cats and dogs" at Banff in the Canadian Rockies, it now rains wild ducks. During a brief but heavy storm a night flight of wild ducks were forced down and mistaking the illuminated asphalt and oil roads for streams, dove breaking their necks. Banff youngsters reaped a harvest of dimes next morning by collecting and selling the dead birds to a local taxidermist.

472 CUTE ONE-PIECE DRESS MADE IN JIFFY

Has bloomers to complete it. And wouldn't you, if you were a tiny maid, love this little outfit. It is light blue linen with white dots, white contrast and white ball button trim.

The scalloped cap sleeves are a cute idea. Don't you think? And it's such an easy dress to make and to launder.

The matching bloomers are gathered into knee bands. They have elastic at the waistline.

Style No. 472 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 35-inch material with 1 1/2 yards of ribbon.

This darling play outfit can be made of sturdy gingham in checks, stripes or plain pastels with white piping trim.

Battiste prints, dotted prints, plaids, percales and dotted swiss are suitable and popular for this cunning model.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Encouragement Needed

#### To Attract Incoming Cargoes To Port Of Churchill

The opening of ports on the Gulf of Mexico did not hurt, but rather helped, United States Atlantic ports, and there is no reason to believe that the opening of Churchill will injure any other Canadian port. Unfortunately, there are always short-sighted people who do not see it that way, and Churchill will continue to receive adverse publicity from Eastern Canadian sources. To offset that publicity some special encouragement should be given to attract incoming cargoes to Churchill.—Winnipeg Tribune.

### Still Ding Good Business

That the horse has not been replaced by machinery on modern farms is shown by the fact that the Canada Wood Specialty Company of St. Marys, Ontario, is now filling orders for 75,000 curly comb handles. The curly comb is used principally for cleaning horses, though quite a supply goes to fishermen. An average of about 500,000 are sold annually in Canada.

Arsenic can be used advantageously in wood preservation processes.

### QUEEN MARY ADMIRES BEAUTIFUL SHOW

One of the annual events in London which their Majesties never miss is the Chelsea Flower Show, where some of the most beautiful floral displays in the British Isles are on view. This photograph was taken as Her Majesty left the Royal Party to admire a particularly attractive corner of the show.

### When the Upheaval Ends

#### World Will Have To Build New Social And Economic Structure

The upheaval through which we are passing is not destined to endure for any great period, but that does not infer that there will be a return to the happy-go-lucky ways of a few years ago. Of necessity there will be new arbitrary standards by which we must abide. Our principles must be essentially sane, and our steps considered and wary.

The rich may not be so wealthy, but neither will the poor be so poor. We will be paid according to our achievements and we will buy according to our means.

At present there is a trend just opposite to the "pre-depression" days, yet equally foolish. We are hoarding, and as a hoarding is poor policy both for ourselves and for the rest of the world. But eventually things will right themselves, when a drop in living costs reaches the point where it matches the fall in earning power. The fear that the standard of living must fall backwards is groundless, although indeed some will have to abandon unjustified ideas of palatial luxury.

From this period on, the world will be busy building a new social and economic structure to support the new order. Architects have praised its lines and have pleaded for its preservation. It has been called "the noblest bridge in the world."

Sir John Rennie, who built Waterloo Bridge along with London Bridge and the Old Southwark Bridge, gave Waterloo since and the British flag a span of 130 feet. In 1817 the completed structure was hailed as the last word in bridge architecture and was destined to care adequately for all the traffic ever likely to pass over it. Up to the coming of the heavy truck and the automobile Waterloo Bridge was equal to the demands made upon it. But times have changed and for years it has been necessary to relieve the pressure on the old bridge by erecting a temporary structure alongside of it.

### Use For Lignite Coal

#### Ontario Research Foundation Studies Possibilities Of Coal Found In North

After two years' painstaking effort, which embraced research work in several European countries, the Ontario Research Foundation will soon be in a position to say definitely just what are the commercial possibilities of the great lignite fields in the Moose River Basin in Northern Ontario.

To sum up the findings of the research workers who include among their number the eminent English technologist, Cyril Tasker, the lignite may be adapted for the following purposes:

A fuel for locomotives (mixed if necessary with a little bituminous oil) for steam raising, for certain kinds of domestic heating and for any special purposes where high and quick heats are necessary. The lignite for the above purposes is treated by the Fielesner drying process which yields about 1,100 pounds of dried lignite per ton of raw lignite treated. After carbonization by German systems the product is suitable for industrial use as necessary. The lignite, for use on locomotives; but it must be briquetted to make it applicable for domestic furnaces. The best material discovered by the research workers to briquet the lignite is coal tar pitch.

### Report Largo Sumpot

#### Has Diameter Estimated At Over 22,000 Miles

A sunspot so large that it would engulf the earth is now on the face of the sun. It is a single spot with a total diameter of 22,000 miles, of which 8,000 miles is the darker, inferior portion or umbra. Two earths of the size of our, 8,000 miles across, could easily be placed within this disturbance in the atmosphere of the sun.

Observations made at the U.S. Naval Observatory, Washington, by C. B. Watts, astronomer in charge of solar studies, show that the spot is just beyond the center line of the sun and four degrees north of the solar equator. It is roughly circular and is the largest spot to appear on the sun this year. Keen eyes viewing the sun through heavily smoked glass may be able to detect it.—Science Service.

### Gravity Comparisons

Measurements of the force of gravity at various points throughout the country are made by the Dominion Observatory, Department of the Interior, Ottawa. This involves the measurement of the period of a pendulum to one ten millionth part of a second—a decidedly delicate operation. Results of these investigations are intended to throw light on the nature of the upper layers of the earth's crust, and are closely related to geological formations and structures, and such processes as denudation and mountain-building.

### B.C. Salmon

British Columbia's output of canned salmon in the five-year period, 1927-1931, averaged 1,540,744 cases annually. Despite the fact that market conditions resulted in the 1931 output being much below normal, the average production in 1927-31 was only 92,000 cases below the average for the preceding five years.

In 1380 half of England's troops were archers, and by 1390 practically all of the archery troops were mounted. The men used a bow about five feet in length, and a three-foot arrow.

It took George Forbes, of Ripon, Wisconsin, only two weeks to build a seven-foot model locomotive, in which only steam pipes and rods are of metal.

## Emissaries Of Scottish Commerce Receive Splendid Reception On Their Recent Visit To Canada

### When Sentiment Won

#### British House Of Commons Saves Historic Waterloo Bridge

It needed action by the British Parliament to save historic Waterloo Bridge which has spanned the Thames ever since 1817. The utilitarians of the London County Council had ruled that the bridge, entirely inadequate to modern traffic conditions, should come down and be replaced by a structure more in keeping with the times. The House of Commons voted the County Council down by 223 to 154.

Waterloo Bridge is architecturally the finest bridge that crosses the Thames. The Duke of Wellington, victor of Waterloo, was present on the occasion of the opening when a salute of 202 guns was fired—a gun for every French cannon captured in the great battle two years before. Artists have put the beautiful arches of Waterloo Bridge in British songbooks. Architects have praised its lines and have pleaded for its preservation. It has been called "the noblest bridge in the world."

Sir John Rennie, who built Waterloo Bridge along with London Bridge and the Old Southwark Bridge, gave Waterloo since and the British flag a span of 130 feet. In 1817 the completed structure was hailed as the last word in bridge architecture and was destined to care adequately for all the traffic ever likely to pass over it. Up to the coming of the heavy truck and the automobile Waterloo Bridge was equal to the demands made upon it. But times have changed and for years it has been necessary to relieve the pressure on the old bridge by erecting a temporary structure alongside of it.

Waterloo Bridge has been rescued from demolition, but it will have to be widened and practically rebuilt. Still its admirable lines will be preserved and the symmetry of Rennie's arches will be preserved much to the delight of those who know fine architecture when they see it. The House of Commons did a good job. Sentiment sometimes wins over utilitarianism.

### Population Increasing

#### Canada Shows Rapid Growth In Ten Year Period

The increase in the population of Canada between 1921 and 1931 was 1,586,247. Of this increase 567,128 took place in the four western provinces and 513,590 in Quebec, it was reported by the Dominion Bureau of Statistics recently.

The population of the prairie provinces grew more than two and a half times as fast between 1921 and 1931 as it did between 1921 and 1926. Alberta grew almost seven times as fast.

The prairie provinces have now 23 per cent of the population of Canada. Twenty years ago they had a little over 18 per cent; 30 years ago less than eight per cent.

The province showing the largest increase in population in the 10 years from 1921 to 1931 was British Columbia, which increased 32 per cent. In the second place, almost neck and neck, came Saskatchewan and Quebec, with about 21 1/2 per cent. Canada as a whole increased about 18 per cent.

Verdun, Quebec, between 1921 and 1931 grew to nearly two and one-half times its size in 1921.

### New Comes Potato Day

#### Suggestion By Farmers In Turkey Has Two-Fold Purpose

A "potato day" to be observed throughout Turkey once a month, has been proposed by farmers of the district of Adana. They asked the Department of Commerce at Ankara to name a day on which only home-grown potatoes shall be eaten. The purpose is twofold: To sell potatoes to a people that prefers rice and to help balance both Turkey's trade and diet. The rice which makes the plaff that figures in almost every Turkish menu is a big item on the import list.

Two New York architects have designed nine-story apartment houses supported on piers, leaving open spaces for children's playgrounds on the street level.

Spring has a spoon on a French inventor's device to be clipped to the edge of a kitchen utensil.

"What do you say to your wife when you go home late?"  
"I say 'Good Evening' and she says 'The rest.'—Hummer, Hamburg.

DECORATE FOR JULY 12	
The officers of the L.O.L. in charge of the Orange Celebration on July 12, request that our citizens will help celebrate the day by putting up their flags, and in any other way possible.	
E. K. STRATHY DEAD	
Word was received this morning that E. K. Strathy, former manager of the Union Bank of Canada here, and one of the promoters of the Lacombe and Blindman Valley Railway, died on Friday last at Seattle.	
DANCE AT LINCOLN	
Bob Paulson and his band will play at the Lincoln Hall on Friday, July 16th. This is a real band, and everyone should attend the dance.	
BORN	
Valens, at Lacombe, on July 2nd, 1932 to Mr. and Mrs. John W. Valens, a daughter.	
The Lincoln community picnic will be held on July 15th at Wilson's Beach. Everybody come for a basket lunch on noon. Good sports will be held during the afternoon and there will be a softball game and horse-shoe tournament.	

Old Suits look like new when they leave our plant. Rainbow Cleaners.

The Misses Helen and Gertrude Pierce left on Monday for a holiday visit with friends in London and other Ontario cities.

Mrs. White, (widow of the late Rev. Matthew White) is in Lacombe, on a visit to her daughter, Mrs. P. C. Owen.

Holidays are here, let us attend to your cleaning needs. We guarantee results. Rainbow Cleaners.

Mr. Bill Casey motored from Andrew to Lacombe with his brother, and will take the Misses Helen and Gertrude Pierce back with him on the day of their holiday with their grandmother.

The W.I. will hold a social afternoon at the home of Mrs. H. Reid, on Friday, July 8th. Hostesses Messrs. Dempsey, Reed, Anderson and Teward.

Wanted to buy a 1/2 h.p. Electric motor. Must be reasonable. Apply Western Globe Office.

The Turville "Whirlwinds" won two successive northball games against Clive, at Birch Lake on June 19 the score being 13 to 9 in favor of the "Whirlwinds" and on July 4th, Turville again defeated Clive by the score of 8 to 6.

Mrs. E. U. Cleveland, mother of E. P. Cleveland, Milton district, accompanied by E. U. Cleveland and Mrs. Burns and son, of Toronto, Ont., together with O. A. Cleveland, of Rosemont, Sask., spent the week at the Cleveland home. A number of Milton residents gave an impromptu party in honor of the visitors, and an enjoyable evening was spent in dancing and music.

Get ready for the big Odd Fellow's Picnic at Lakeside Camp (Ebeling's) Gull Lake on Wednesday, July 13. All Odd Fellows and their friends are invited to come and enjoy a real afternoon of sports. Bring along your bathing suits and have a swim. The Odd Fellows will make you welcome, so be there and picnic with them.

According to a statement at the convention of the Canadian Medical Association, held in Toronto, Ont., in 1930. This year the amount is expected to be treble or quadrupled. This is a financial sacrifice which is not appreciated as it should be.

**GOLF NOTES**

That third annual Golf Tournament of the Lacombe Golf and Country Club will be held on Friday and Saturday the 15th and 16th July. The course will be in excellent shape and good prizes will be offered. The entry is anticipated. Meals will be served by the ladies. All members who can possibly do so should attend. Qualifying round begins on the morning of the 15th July at 8:30 a.m. On Sunday following, the Alberta Country Districts Golf Assn. section playoff will be played on our course. This takes in winners in District 7, composed of Lacombe, Red Deer, Innisfail and Didsbury. District 8, Stettin, Cadron, Carleton Place, and District 16, Provost, Edmonton, Hughenden and Wainwright. District 10, Vermilion, Lloydminster, Vegreville, Innisfree and Mannville. This competition is sponsored by the Lacombe Herald, and the winner here will go to Calgary, at a date to be announced later, as guest of the Calgary Herald, and play in the final.

**ST. ANDREW'S CHURCH**

On Thursday evening, July 7, a beach concert will be held at the boy's camp, Meridian Beach, Gull Lake. If the weather is unfavorable the concert will be held in the pavilion.

On Sunday, July 10th, members of the Orange Lodge throughout the district, will meet together for worship in St. Andrew's Church.

The regular monthly meeting of the Board of Managers will be held on Tuesday evening, July 12th.

**NEW BOOKS IN LIBRARY**

Best of all fly killers. Clean, safe, sure, cheap. Ask your druggist, grocer or General Store.

July 8th has been postponed indefinitely.

Apparently there is more Scotch in the district than one would suppose—as a number of residents are taking advantage of the free installation of the telephone. All the old subscribers will soon be back on the list.

**DEATH OF MRS. E. C. CROOKER**

The many friends of the family in Lacombe and district, will be grieved to learn of the death of Mrs. E. C. Crooker (nee Nora Pearl Burton) which occurred on Sunday last. Up until the time of her death, deceased was apparently in her usual state of health, and her sudden death was a great shock to her husband and family. A daughter of Mr. and Mrs. W. W. Burton, highly respected farmers of the district, deceased had a host of friends in town and country who extend their sincere sympathy to the bereaved family. The funeral was held on Tuesday afternoon, in the morning being held in Lacombe cemetery. The services at the United Church were attended by a large number of friends and beautiful tokens of regret were received from many. Deceased, besides her husband, leaves two young children to mourn her demise, Fred, aged four and Dorothy, aged two years. The sincere sympathy of all is extended to the bereaved family.

## Lacombe Fair and Stampede

August 2nd and 3rd

The Lacombe Annual Fair will be held on August 2 and 3. Instead of the usual midway and grandstand attractions, a stampede will furnish the entertainment. The stampede feature will be outstanding as arrangements have been made for the horses and riders which provided the thrill of a genuine Stampede to take part in this event.

The agricultural fair this year has to stand on its own feet as no grants, either Provincial or Federal, will be available. Everyone is undertaking to boost and make the fair bigger and better in spite of the lack of these grants.

The fair this year will be strictly agricultural in that only livestock will be shown and the prizes will be paid on a percentage basis. Everyone promising enthusiastic support in the way of exhibits.

Be sure and keep these dates open for two days of fun and frolic.

**SPRUEVILLE NEWS**

Mrs. E. C. Crooker died suddenly at the home of her parents, Mr. and Mrs. Burton on Sunday last. Mrs. Crooker had been staying with her sister to recuperate after a serious sickness, when she took suddenly ill and passed away almost instantly. The funeral service was held on Tuesday from the United Church, where a large crowd gathered to pay their last respects to one who was loved by all who knew her well. Our heartfelt sympathy is extended to those bereaved by her death, especially her husband and little ones.

Mr. and Mrs. Boulter left on Saturday by motor for Kerrobert, Sask. where they are visiting with relatives. The U.F.A. picnic planned for

## AT THE AYALON

This Week End Double Feature

An unusual love and strange sacrifices, in a background of war, are the dominant notes of "Surrender", the William K. Howard production for Fox Films. Warner Baxter occupies the leading role and divides the romantic interest with beautiful Lella Hyams. The cast includes Ralph Bellamy, Alexander Kirkland, William Pawley, Howard Phillips and C. Aubrey Smith, in addition to more than 1,000 extras.

The other feature is "Alias the Bad Man", starring Ken Maynard, "Surrender" starts at 7:30. "Alias the Bad Man" 8:35. "Surrender" 9:40.

Saturday, two full shows, Coming—"Broken Lullaby," July 14, 17 and 18.

**GULL LAKE NEWS**

Mr. George Jenkins, of Gull Lake received the following letter from the Red Deer Full Time Health Clinic. Dear Mr. Jenkins:

In answer to your letter of June 27, I may say that I have the least report of our Sanitary Inspector on your dairy and method of handling your milk, and the report passes your establishment as quite satisfactory.

G. M. Little, M.O.H.

Wm. Kinley, R. R. No. 3, Lacombe.

## Kluckers Klash Klonecning Kash Collected by Kleagle

In Other Words—Klansmen Want To Know  
What "Ex-Cleric" Maloney  
is Doing With Their Money

Edmonton, July 6.—Two claims against Maloney by his clerical associate, Rev. Duncan McDougall, M.A., and a Supreme Court action brought by two members of the Alberta Realm of the Ku Klux Klan, were filed in the Supreme District, and Small Debts courts this morning by the legal firm of Grant and Stewart.

The plaintiff in the two wage claims is a well known Gaelic scholar and minister of the Free Church of Scotland. Prior to joining Maloney recently, he was minister of Highland Church at Vancouver and used to preach in Gaelic. He was also editor of "The Beacon."

In the action in the Small Debt Court, Rev. Mr. McDougall is suing Maloney and his associates in the Imperial Klonecning of the Invisible Empire Knights of the Ku Klux Klan of Alberta for a balance of \$76 claimed under an agreement to lecture for that body for \$35.00 a week.

Defendants in the Supreme Court action in which an injunction is asked restraining Maloney from using the money of the Klan lodges in Alberta, are J. J. Maloney as Imperial Wizard; Imperial Klonec, J. E. McInnes; Imperial Kleagle, Harold Wright, together with Philip Snider, P. H. Wedderburn, Charles Jackson, W. A. Clamper, James Young, and A. William Andrews, who are alleged to be all members of the Supreme Council or Imperial Klonecning of the Alberta Realm of the Invisible Empire Knights of the Ku Klux Klan of Canada.

The plaintiffs are Charles Henry Marson and John H. Young who claim to be members of the Imperial Klonecning and are suing on behalf of themselves and all other members of the Klan.

The statement of claim reveals the internal organization of the Klan in local lodges or Klaverns, which are grouped into divisions known as Klantons. The plaintiff, Young, claims to be chief officer of the Edmonton Klanton with jurisdiction over seven lodges or Klaverns.

**NOTICE**  
Miss A. Peterson wishes to announce that she is now operating the Bob Inn Beauty Parlour. For appointments phone 118.

**CANADIAN BANKING SYSTEM EXTOLLED**  
The Canadian banking system looks good to observers across the border. During the past few years a few thousand American banks were forced to close their doors with consequent enormous loss to depositors. The absence of similar banking casualties in this country has attracted attention. There has been no bank suspension in the Dominion since 1923 and only one institution has closed its doors since 1919.

The current issue of Commerce and Finance, New York, contains a lengthy article on the Canadian banking system by Horace F. Pomeroy. He analyzes our banking system closely and observes: "In these troublous times, a banking system which has withstood the ravages of almost three years of world-wide depression without a single casualty provides a refreshing object of study."

After a brief historical review of Canadian bank development, he outlines the reasons for our banking solidity. One is the arrangement under the Bank Act by which a bank's lien on security for loans follows the security for loans from one bank to another. This follows the security through all forms of development. He instances the process from standing timber paper. Another factor which has lent great strength to the banking system is that Canadian banks carry no loans on real estate. Otherwise no restrictions are placed on the character of investments which banks may hold. Mr. Pomeroy further commends the Canadian system of branch banking. He considers them flexible and best suited to the needs of the country. Another secret of banking soundness is the method of training banking men for higher positions. They are sent from one post to another in different provinces and thus acquire first-hand knowledge of most of the country.

"The proven soundness of the Canadian banking system during the present financial and economic unsettlement," concludes Mr. Pomeroy, "furnishes reason for believing that the Dominion will be in the van of the next forward surge of general business."

**Situation Wanted**  
Mrs. Edna Murray, widow, desires place as housekeeper for widower or bachelor. Apply at Neil MahFarlane's residence.

**POSITION WANTED**  
Position as housekeeper for widower or bachelor. Capable, willing worker, good cook. Can take full change. Reasonable wage. Apply (Mrs.) Eva Waldron.

**FOR SALE**  
New No. 12 De Laval ..... \$77.00  
Williams Pump ..... \$119.00  
Connor Electric Wagon ..... \$119.00  
160 acres to exchange for Lacombe house property. C. R. Hembury, Lacombe, Alta.

It is set out that the initiation fee \$13 for men be divided as follows: \$3 to Maloney as two year's subscription to the Liberator, \$4.50 to the treasurer of the local lodge, except where there is a Klanton, in which case it goes to the Klanton, and the balance of \$5.45 is allotted to the treasurer of the Imperial Klonecning.

The \$250 initiation fee for women is divided \$150 for the Liberator, \$23.30 to the local lodge or Klanton, and \$27.70 for the use of the Imperial Klonecning.

The dues and assessments are said to be \$9 per annum for males after the first three months of membership and \$4 for females, of which sum 85 per cent. goes to the local lodge or Klanton and 15 per cent to the Imperial Klonecning.

It is alleged that all the initiation fees and annual dues have been sent to the defendants, but that they have neglected to pay back the proper share to the local Alberta lodge and to the Edmonton Klanton.

Mr. Young charged that when he started to investigate to find out what had been done with the monies, a meeting was called on June 18 at which he was suspended from membership and banished from the Klanton.

Mr. Marson who is acting as co-plaintiff was employed as an organizer for the Klan. His complaint is that after he had represented to his customers that they were receiving membership in the one and only Invisible Empire Knights of the Ku Klux Klan, he finds there is another body in the province of Alberta holding charter powers from the Ku Klux Klan of Canada.

The plaintiffs are asking for an accounting of all moneys received by Maloney and his associates on the Imperial Klonecning; a declaration that Young is a member in good standing of the Edmonton Klanton and of the Imperial Klonecning, and for an order that they pay back to Marson all the interim fees and dues paid by him and by those whom he had induced to join.

**JUDICIAL SALE OF FARM PROPERTY NEAR LACOMBE**  
PURSUANT to an Order for Sale there will be sold by Public Auction at the Post Office in the Town of Lacombe, Province of Alberta, at two o'clock in the afternoon on Saturday the 23rd day of July A.D. 1932, the following deceased property: The South West quarter of section thirty-two (32) and the South East quarter of section thirty-one (31) and the North West quarter of section twenty-nine (29) all in Township forty-one (41) range twenty-six (26) West of the third meridian, in the Province of Alberta, subject to prior encumbrances registered against the said land, particulars of which will be exhibited at the time of sale, and subject to the reservations contained in the existing Certificate of Title.

The property will be offered for sale subject to an upset price which has been fixed by a Judge at the sum of \$7800.00, and subject to taxes due on the said land, a statement of which will be exhibited at the time of sale.

Terms of sale, 25 percent cash and the balance within sixty days from the date of sale.

The vendor is informed that there are upon the said lands the following improvements:

1 Frame shingled roof cottage in fair condition.  
1 Frame shingled roof granary in fair condition.  
2 Log and frame stables.  
1 Small frame well house.

There are about 270 acres of the said land under cultivation and 210 acres now used for pasture, a considerable portion of which can be brought under cultivation.

The soil consists of rich, black loam.

All the said land is enclosed with a two strand barbed wire fence in poor condition. There are also cross fences.

The said property is situated six and one half miles from the Town of Lacombe, and three and one-half miles from the Ardmore School.

For further particulars and conditions of sale apply to J. S. McCormick, Solicitor for the Plaintiff.

Dated at Lacombe, Alberta, this 27th day of June A.D. 1932.  
E. S. Hegg, Clerk of the Court.

## To Protect Other Investments— keep a Savings Account

THE most dependable form of investment is money in a Savings Bank. With most investments you have to sell at a loss to obtain cash in an emergency. But money in a savings account never depreciates in value. It is always ready for use and earns a steady 3% interest.

Whatever your circumstances, you should keep an adequate Savings Account as your private investment. At The Royal Bank of Canada you will receive efficient and courteous attention.

The National Government has contracted with a group of former military aviators to develop a Chinese air force.

Amelia Earhart received the Order of Leopold from King Albert of the Belgians in recognition of her solo flight across the Atlantic.

On her first trip through the Strait of Belle Isle this season, the Canadian Pacific flag ship "Empress of Britain" again broke the record for Atlantic crossing.

Cpl. Herbert Swinford, veteran of the Red River Rebellion in 1870, and the North West Rebellion 15 years later died in Winnipeg at the age of 83.

Prof. J. W. Gregory, Scottish geologist, and head of a scientific expedition studying earth movements in the Andes, was drowned recently, a brief wireless report said.

The total value of output of the British Columbia Fisheries in 1933 was \$11,109,822, compared with \$28,103,302 in the preceding year, according to a report issued by the Dominion Bureau of Statistics.

The fruit bill of the United Kingdom went up by nearly \$32,000,000 last year, according to a report issued by the empire marketing board, with provisions for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second.

Nearly 7,000 persons were killed and more than 20,000 injured in road accidents in England within the last twelve months, according to parliamentary returns. In London Metropolitan Police District alone, 1,328 persons were killed and more than 6,000 injured.

British Columbia lumbermen will send a trade delegation to China to foster trade with that country if a suggestion put forward by Hon. Nelson Lougheed, Minister of Lands, to the executive of the British Columbia Lumber Manufacturers' Association is adopted.

## Had Original Ideas

New South Wales Bandits Out After Big Booty

These are days of mysterious accidents, peculiar robberies and dastardly crimes of all descriptions. But one could not help but smile at the news despatch from Sydney, N.S.W. That bandits stole a brick wall 30 feet long and six feet high. Others took 30 locomotives all excepting the frames, while still others carried off part of a church. This story is somewhat along the lines of one of the "rackets" in the United States where high-pressure thieves will back a moving-van up to a home or an apartment and if nobody stops them, take the entire furnishings in one trip.

Keeping one's possessions is not as easy as it used to be, not even as easy as in the days when might meant right.

## New Discovery Valuable

Makes It Possible To Evaporate Platinum Like Water

Platinum is caused to evaporate like water by a discovery announced from the California Institute of Technology. This precious vapor, probably the world's highest-priced mist, condenses into unimaginably thin films upon a wide variety of materials. It coats them virtually permanently. Smoother than dew it will cover fibers, converting them into plant, filmy threads that seem made of pure platinum.

"Is your daughter going to practice on the piano this afternoon?"

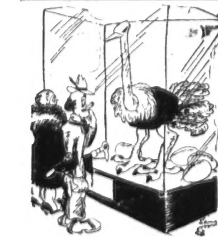

"Yes."

"Well, then will you please lend me your lawn mower? I have to do the lawn some time, anyway."

A gardening expert advises amateurs to sow their seeds in strict rotation. We trust that the majority of them will give the virginia creeper a sporting start on the scarlet runner.

This year marks the hundredth anniversary of the lawn mower. Its invention made borrowing possible on a much larger scale.

The fire department of Edinburgh, Scotland, answered 1,180 calls last year.

He: "It is dear to come in but one sees rare animals."

Outback: "He doesn't realize that I can see strange creatures for nothing."

—Buen Humor, Madrid.

## Pats End To Holidays

Magistrate Takes Joy Out Of Life For Lazy Woodcarver

Charles Monosello, woodcarver and cabinet-maker, has a steady job now, thanks to his wife and two children and Magistrate Joseph Goldstein. Mr. Monosello, 45, has not had a real job for a good many years, according to his wife. He has not wanted one. On that account she has taken him to Family Court many times.

This means vacations for the stalwart wood-carver—food and drink (water)—at Welfare Island, and poker games with matches.

It meant starvation for his wife and two small children.

Monosello went before Magistrate Goldstein in Family Court on an application for release from the Workhouse. Could he post a \$300 bond to pay his family \$17 weekly? "No," languidly.

"Back to the Workhouse!" said Magistrate Goldstein, who added that he had been waiting for a chance to evoke a law inert for twenty years. He directed the warden to buy lumber and tools for the woodcarver and set him to work.

"And remember," he said to the prisoner, "no work, no eat."

The warden is to arrange to sell the cabinet work to city departments. The proceeds will pay for the cost of the materials and Monosello's food, and the rest will go to his family.

There is good sense in this.—New York World-Telegram.

## Not Much Difference

Vegetarians Healthy But Slow In Generating Body Heat

Experiment running over two years has been concluded at Kansas City where a professor has been observing 70 vegetarians and comparing them with meat eaters. He finds that the vegetarians do not generate body heat and energy as quickly as meat eaters, placing the difference at 10 per cent. The vegetarians, he said, do not appear to be more active or intelligent than any others, nor are they more apt to become sick. Apart from generation of heat he could see little difference in the two plans of diet.

A BOON TO STOUT WOMEN—THE ADJUSTABLE SLIP

Its wrap-over front makes it shadow proof.

There isn't anything more essential for a slender appearance than a well-fitting costume slip.

Today's model reduces the breadth of the figure and does it gracefully.

There is a narrow slash that slips through a bound opening at the right hand side of the front. It is brought around the back and tied in a bow, adjusting the slip to suit its wearer.

The wrap-over fronts allow plenty of freedom for the hemline and still retain the straightline of the slip.

And to make it! You'll be amazed at its simplicity. Cut it out and practically only edges to be bound, after the sides and shoulder seams are closed.

Style N. 522 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 4½ yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## Contract Bridge

By Hamilton B. Hatch, Cleveland Club, Toronto

In my last article, I discussed the Official System of Contract Bridge from the standpoint of the fundamental differences between it and the Approach-Forcing System. Today's article has to do with the so-called One-Over-One variation of both these systems. The One-Over-One has been developed by Geo. Bell of the Kitchener-Windermere Club, New York. Many of the members of the club have assisted in bringing this system to its present state of excellence. The Four Horsemen of Bridge, Le. Hal Sims, David Burnstine, Willard Karm, and Oswald Jacobson, use this system and have won many national and sectional championships.

Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system has helped them materially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same minimum requirements as The Approach-Forcing System, with the exception that with strong distributional hands, i.e. two aces, the bidding may be opened with less than two and one-half honor tricks. An example of this opening would be the following:—Spades A J 9 8 7, Hearts K Q X X X, Diamonds K Q X X X, Clubs X.

2. Provided there is no intervening bid and the partner of the opening bidder responds with a bid of one, other than one no trump, this response is definitely forcing and demands that the original bidder keeps the bidding open for at least one more round. The difference between the Approach-Forcing and the One-Over-One is that any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One force simply requires that the bidding be kept open for at least one more round.

Example: If the opening bidder bids one diamond and second hand passes, then if the opening bidder's partner bids one heart, the original bidder must bid again. The advantages claimed for this system by its advocates is, that the partners inform each other of their respective holdings at low bids, and also that this bidding comes from the opponents with the strength and weakness of the bidding hands. Where the hands are strong there is always the chance that the opponents will make a defensive bid and find themselves caught between the upper and nether millstones with the result that they suffer a substantial penalty.

2. The opening bid of two in a suit is based on losing tricks and not on honor tricks. In other words a two bid is made on hands which definitely assure the partnership of a game even if the partner of the two bidder has a complete "bust."

The type of hands which lend themselves to this bid are usually powerful two suiters or a very powerful one suiter. Example: Spades A K Q X X X, Hearts A K X X X, Diamonds A K X X X, Clubs X. In this hand even with a six spot high in partners hand, game is assured, as the original bidder has only three losing tricks.

3. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades A K Q X X X, Hearts K Q, Diamonds X, Clubs A K Q X. If after a three spade bid the response is four diamonds slam is definitely assured in spades. This is the only situation in any of the systems so far discussed where ace showing is countenanced.

4. In all other situations except those outlined above, the One-Over-One has no variations of consequence from the Approach-Forcing System.

The weak no trump response is used to show a balanced hand to two trick hand. All no trump bids other than jump no trump and original no trump are used to definitely measure your quick trick strength and in almost every case the no trump bid shows a minimum holding. However, in the One-Over-One, many users of the system make an opening bid of one no trump on a strong hand. If one no trump is bid and partner responds with two no trump the original bidder guarantees enough extra value to bid to three. In other words the contract is either one no trump or three no trump. The hand, provided there is no adverse bids, is never played at two no trump. In suit bids if the opening bid is one heart and partner responds with two hearts the original bidder either passes or bids four hearts, never three. In major suits therefore where no interference bidding occurs, the contract is either two or four. In the minors it is either two or five.

It is probable that the intelligent use of this system requires greater experience than the use of the other systems. It is certain, however, that in the acid test of keen duplicate competition, the users of this system have been extremely successful.

Whether their winning is due to the system or to the fact that they are master players, is among users of other systems, a mooted question.

The next article will deal with variations and their variations.

## WRITING WINS AUTOMOBILE

F. L. C. Bond, general superintendent for C.N.R., Montreal district, congratulating C.N.R. brakeman Donat Cyr, of Montreal, after Cyr has received a new automobile—the prize he won when F. D. Jacob, for 15 years Dominion Graphologist, and other judges decided Cyr's writing was more interesting than any of the thousands submitted in the Imperial Tobacco's first series of contests wherein competitors write on the inside surface of Turrel cigarette packages. At the left is W. B. Tingle, director of the tobacco company; A. Desrochers, also of the Imperial Company; J. E. Gibeault, superintendent for C.N.R., Montreal district, and the winner himself, batties. Photo, Canadian National Railway.

## Progenitor Of Human Race

Study Of Skull Of Pre-Human Creature Found In Java

The fair sex scores against the old Java "ape-man," the pithecanthropus erectus, oldest known possible ancestor of the human race, has turned out to be a woman.

Study of the skull of the only specimen of this ancient pre-human creature, which died in Java about 500,000 years ago, says Dr. Ales Hrdlicka, expert on bones and skeletons, shows undoubtedly it was not a male but a female. His word came in an announcement from the Smithsonian Institution.

This new light on the sex of pithecanthropus erectus is of special interest because "he" or "she" is a sort of missing link between modern man and his theoretical earliest ancestor, from whom many believe both man and apes may be descended.

Pithecanthropus was neither human nor ape, but her bones reveal, says Dr. Hrdlicka, that she was well on the way toward human form.

He was decided that pithecanthropus was a female from study of the jaw, or top of the skull. This and the lower jaw, a thigh bone and three teeth were unearthed 30 years ago in Java. Ever since, scientists have been studying the bones in an effort to reconstruct the appearance and habits of their original owner.

The brain cavity of this strange old great-grandmother or perhaps great-uncle, of the human race, was about twice as large (in relation to probable body weight) as that of any of the great apes, says Dr. Hrdlicka. It was almost as large as brain cavities of some north American Indians.

The pithecanthropus brain cavity had a capacity of about 900 cubic centimetres. Brain capacity of the largest known gorilla does not exceed 600. The Indian brain runs from 910 to 1,020.

## Leadership Of Prince

Heir To British Throne Is More Than Theoretician

Because of his commanding position as heir to the British Throne and on account of his personal popularity, the Prince of Wales has an unusual opportunity for public service of a practical nature, and of this opportunity he is taking full advantage. He is more than a theoretician, and whether his audience be composed of business men, industrialists or farmers, he speaks to them in their own language. They realize that he has made himself familiar with their problems.

Leadership is the great need of the day, and this his Royal Highness is providing in an energetic and practical manner.

## Recipes For This Week

(By Betty Barclay)

## OATMEAL COOKIES

1½ cups special cake flour, sifted.

2 teaspoon baking powder.

¼ teaspoon salt.

2 teaspoon cinnamon.

1 teaspoon cloves.

¼ cup butter or other shortening.

1 cup sifted brown sugar.

1 egg, well beaten.

1½ cups oatmeal.

¼ cup milk.

Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg, add oatmeal and flour alternately with milk, mixing well. Drop by teaspoon on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 15 to 20 minutes. Makes 4 dozen cookies.

## COCONUT BLANCHMANGE

5½ tablespoons flour.

¼ cup sugar.

¼ teaspoon salt.

2 cups milk, scalded.

1 cup coconut, premium shreds.

2 egg whites, stiffly beaten.

1 teaspoon vanilla.

Combine flour, sugar, and salt. Add milk gradually, place in double boiler, and cook until thickened, stirring constantly. Add coconut and cool. Fold in egg whites and vanilla. Chill. Garnish with tart jelly. Serves 6.

## Doctor Claims Goitre

Affecting People More Seriously Than Diphtheria Or Typhoid

The public should be taught that goitre is a preventable disease. Methods of prevention should be as commonly known as the prevention of typhoid and diphtheria, neither of which is affecting the population today as seriously as the disease of the thyroid gland, Dr. M. O. Shivers, Colorado Springs, Colo., told the American Association for the Study of Goitre in his presidential address at Hamilton, Ontario.

Committee of the association in each state and province were urged by Dr. Shivers to co-operate with governments and the press in spreading the knowledge of prophylaxis which would reduce the ravages of this simple, preventable disease.

## Claims Largest Dog

The Rev. J. Gard, Baptist minister at Ithaca, Leicestershire, England, claims ownership of Britain's largest dog, an Irish wolfhound. Three feet high at the shoulders, and weighing 154 pounds, the dog is as large as a donkey.

## Lack Representation

Federal Government Has Low Percentage Of Farmer Members

In the Senate of Canada there are 98 members, and of these but 11 are farmers. The House of Commons has 247 members, and of these but 12 per cent. representation in the Senate, and 15 per cent. in the House of Commons. So that the basic cause of the little attention paid to farmers' complaints and to agricultural interests lies in the lack of representation. A profession which represents the largest percentage of any profession within the country is not organized, and it is pitted against the most highly organized unions and professions of other kinds.

## Special Fellowship

Awards Announced

Students Of B.C. and Saskatchewan Are Among Winners

The school of graduate studies in the University of Toronto, has announced awards of special fellowship open to graduates of other Canadian universities. The successful candidates are:

J. R. Daniels Beal and Miss M. J. Fisher, University of British Columbia; H. M. Chisholm, Dalhousie University; H. N. S. E. O. Bratton, University of Saskatchewan.

## Reason Is Obvious

An eminent American lawyer went to London recently to study the British legal system. An equally eminent English lawyer undertook to show him round the Law Courts. They listened to cases, and the Englishman explained all the fine points of the administration of British justice. The American said afterwards: "There is no doubt that your system is better than ours. But I cannot understand why. After all, in America we have got the very best judges that money can buy."

## Proof Positive

Man: "Do you think the dead can communicate with us?"

His Friend: "I know they can't. Once I managed to borrow a Siver from a Scotsman. A week later he died. I haven't heard a word since."

NEW MAID: "How do I announce dinner? Do I say, 'Dinner is ready' or 'Dinner is served'?"

MISTRESS: "It is like it was yesterday, just say 'Dinner is burnt'."

Gazzettino Illustrato, Venice.

## Life Has Been Exciting

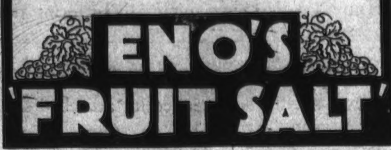

Eighty-Five Year-Old Englishman Cannot Complain Of Monotony

Sir Claude Champion De Crespigny, who has the distinction of having served both with the Royal Navy and the Army, entering the Royal Navy when only 12 years of age, has just celebrated his 85th birthday. Sir Claude is feeling much better this year than last. With Lady De Crespigny he has just returned to England from a six-weeks' trip to the West Indies, and that has done him both a lot of good. He does not feel any ill-effects from the fourteen bones which he is said to have broken during his many years of sporting activities. He broke two legs while ballooning, three ribs at steeplechasing, three fingers while playing another rib through a horse's kick, and was once nearly scalped by a favorite monkey. "One of my tightest corners," he has said, "was when I jumped into a river infested with sharks to save a man's life." One day, long ago, Sir Claude fought a watermelon with bare fists for an hour and a half, and although two of his fingers were broken he did not stop until the police arrived! Sir Claude has also fought a python, escaped from

## Keep Health the Eno Way

You do not have to use drastic and strong cathartics that cause irritation. ENO'S "Fruit Salt," by gently and safely ridding the intestinal tract of poisons, will help to make you and keep you healthy. A dash of ENO in a glass of water every morning or night prevents the evils of constipation. Be ENO conscious!

## THE HOUSE OF DREAMS-COME-TRUE

MARGARET FIEDLER  
Author of "The Splendid Folly," "The Hermit of the Red Sea," "Hodder & Broughton, Ltd., London."

CHAPTER XXIII.—Continued.

"Then, to please me—for nothing else in the world, if you like, but because I ask it—will you let things stay as they are for a few weeks longer? Just that little while, Nick? We're going to London next week. That'll make a break—bring us all back to a calmer, more everyday outlook on things. Will you wait? Sir Adrian may never strike Claire again. And it wouldn't be fair—just now, at a time when she is feeling horribly bitter and humiliated from that—that insult—to ask her to go away with you. Give her a fair chance to decide a big question like that when things are at their normal level—not when they are worse than usual. To ask her now would be to take advantage of the feeling she must have, just at this moment, that her life is unbearable. It wouldn't be playing the game."

He made no answer, and Jean waited with increasing trepidation. She was sure now that she could hear footsteps. Someone had mounted the stairs and was coming along the corridor towards her room.

"Nick!" The low, agitated whisper burst from her as she stepped hastily outside the door. "Promise me!"

It seemed an eternity before he answered.

"Very well, I promise. You've won for the moment—'Saint Jean'!"

He smiled at her, rather sadly. Before she could reply, Blaise's voice sounded outside the door, asking if he might come in, and with a feeling of intense relief that the battle was won for the moment, Jean gave the required permission. As his brother entered the room, Nick quitted it, brushing past him abruptly.

Tormarin's eyes questioned Jean's. "We have been discussing Sir Adrian," she explained, as the door

**You can cook 3 vegetables AT ONCE in the same saucepan by using GANAPAR**

Do each vegetable up in its own bag of Ganapar Cookery Parchment. There's not any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up. When roasting meat, line your pan with Ganapar. Fat and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Ganapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't shed lint. Made by the makers of the famous PARASOL Waxed Paper in the Green Box.

**Special Offer**  
Most grocers, druggists and department stores have Ganapar on sale, but if yours hasn't, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Lettovers," containing one hundred recipes as a bonus for your trouble.

Applied Food Products, Ltd., Hamilton, Ontario.  
Enclosed find 25c for which please send me one full size package of Ganapar Cookery Parchment and your 100 recipes for "Lettovers."

ering nerve of her that whatsoever the future might bring—even though Blaise might choose to shut himself away from her again as in the past and the dividing wall between them rise as high as heaven—she knew now, without a shadow of doubt or questioning, that he loved her.

In the burning utterance of a single word, in the pressure of passionate, renouncing lips, the assurance had been given, and nothing could ever take it away again.

She spread her hands, palms upward, and looked at them curiously.

### CHAPTER XXIV.

#### An Unexpected Meeting

"Have you been very bored, Nick?" The week in London had nearly run its course, and Lady Anne's eyes begged charmingly for a negative. Nick accorded it with a smile.

"I'm never bored with you, madonna; you know that," he said. "And hotel life is always more or less amusing. One comes across such queer types. There's one here this evening has been intriguing me enormously. At a little table by herself—do you see her? A tall, rather gorgeous-looking being—kind of cross between the Queen of Sheba and Lucrèce Borgia."

Lady Anne threw a veiled glance in the direction indicated.

"Yes, she's a very handsome woman, obviously not English." Her eyes travelled onwards towards the door. "I wish Blaise and Jean would hurry up," she added impatiently.

"They're taking an unconscionable time dress."

The two latter had come in late from a sight-seeing expedition undertaken on Jean's behalf, and had only returned to the hotel just as Lady Anne and Nick were preparing to make their way to dinner.

"For such a deliberate matchmaker, you're a lot too impatient, madonna," commented Nick teasingly. "That they should have stayed out together until the very last moment ought to have pleased you immensely."

Lady Anne made a small grimace.

(To Be Continued.)

### Modern Civilization

American Banks Overflowing With Gold and Piles Suffering From Poverty

Only those who have been employed a long time and have experienced the feeling of savings gradually swallowed up to buy food for their families, with no prospect of anything in sight, can really understand the horror of the situation. Unemployment is the most dreadful specter of labor, and employers and administrators should do everything in their power to avoid it, and to alleviate the conditions when they occur.

One cannot help feeling profound sympathy for the crowd of men who stormed a factory at Detroit when there was a call for hands. The consciousness of families on the verge of want with no avenue of escape made them desperate, and when the vacancies were filled they refused to be turned away, claiming that there might be room for just one more man. But the police were called, clubbed the men and dispersed them with tear gas bombs.

The desperation of need turned these men into fighting beasts for jobs. And all that modern civilization in the United States could do for them was to club them and throw tear gas bombs at them. Yet the vaults of the American banks are overflowing with gold which cannot be put to its proper use.

Is the United States the richest country in the world? Is it the highest developed civilization that it is supposed to be after generations of government?

Just as a chain is no stronger than its weakest link, so is a nation no stronger than its weakest section of humanity.—St. Thomas Times-Journal.

**University To Economize**  
Abandonment by the University of Montreal, of three courses and the practice of sponsoring free public lectures, was announced recently by Canon Emile Chartier, dean of the university. The move was in accord with the university's plans of stringent economy, Canon Chartier said.

**Goods Sell Readily**  
Sale of goods made by blind persons under the auspices of the Canadian National Institute for the Blind during the past year realized a total of \$476,903. It was shown by the report presented to the 14th annual meeting of the institute in Toronto.

Trouth have been known to live in captivity for more than 20 years.

Leeds, England, may use cast iron blocks for pavements.

**PURELY VEGETABLE**  
Act gently but surely on both liver and bowels  
Safe for CHILDREN  
Sold everywhere in 25c and 75c per box.  
CARTER'S LITTLE PILLS

### The World in Trouble

No Directive Power To Alleviate Conditions Which Threaten Our Very Existence

We are living in a civilization which is very rapidly going to pieces. There may be a dreadful rate in store for many young people here tonight. You may be shot, or maimed or starved before your lives run out!

One thing is certain—you will never be bored.

Our economic system has failed due to the extraordinary thing that while mankind has increased production to an enormous extent one-half of the world is threatened with famine. In spite of these calamities which endanger our very existence, nothing is being done.

The reason is apparent. There are no comprehensive organizations in the world capable of undertaking the restoration of our money and credit, our economic and social life. Our directive organizations have not kept pace with the developments of modern life, and that is the essence of the trouble which threatens ruin and disaster to the world today.

Just as in the time of Noah, when the Flood came, we must build an ark amid the waste of ruin that is around us. And our efforts to save civilization fall, then we may take heart in that perhaps we are laying the foundations for another and far better one.—H. G. Wells.

### Frozen Wild Flowers

Flowers Sent From Australia To England Were Kept In Refrigerator

An interesting example of the application of refrigeration to industry is afforded in the following item which appears in the current issue of the Cold Storage News Letter, issued by the Dominion Dairy and Cold Storage Branch:

"A bunch of waratahs, flannel flowers, and native roses arrived in England from Australia recently. They were shipped by Mr. John Shorter, Australian agent for Messrs. John Doulton, of Lambeth, to show the English pottery painters the true form and color of some of Australia's most popular native flowers. Typical blooms were selected for the purpose, and were placed in a can of water which was frozen by the Fresh Food and Ice Co., Ltd. Afterward, the ice block containing the flowers was placed in a wooden box and sent to the dealer to be placed in the freezing chamber."

### Fish and How To Cook It

Dominion Department Of Fisheries Issues New Booklet Printed In Both French and English

Copies of the new book, "Fish and How To Cook It," which has been issued by the Dominion Department of Fisheries, are now available either in French or English at a price of ten cents each. The booklet has been prepared under the direction of Mrs. Evelyn Spencer, specialist in fish cookery, who is now on the department's staff. It gives authoritative information and is designed to meet the needs of the average Canadian household. Persons wishing to receive the booklet should write the Deputy Minister of Fisheries, Ottawa, enclosing ten cents for each copy required and stating whether an English edition or the French edition is desired.

### For Trade Agreement

Round Table Conference Between Canada and U.S. Is Suggested

A round-table conference between Canada and the United States to thresh out a trade agreement looms as a possibility should Franklin D. Roosevelt be elected president of the United States, an Albany dispatch to the Montreal Star from a staff correspondent says.

In an interview with the Star's correspondent Governor Roosevelt said: "You in Canada have things we want, we have things you want. I would say: let us get together at a round-table conference and work out a practical system of fair exchange."

### Relief In Budapest

Last winter the city of Budapest distributed to the poor 10,000,000 dinners, 1,000,000 plates of soup, 2,200,000 pounds of bread, 50,000 food coupons and 36 wagon loads of food packages. Two thousand babies were provided with complete outfits and 10,000 stoves were distributed among school children.

**Women Outnumber Men**  
A fifth of the total population of Scotland is concentrated in Glasgow, the decennial census figures, now made public, show. The population of Glasgow is given as 1,088,641, with 107 females for every 100 males. In Edinburgh the women outnumber the men by 12 to 10.

Canadian farm flocks of hens and chickens increased by 5,320,000 between 1930 and 1931, the annual statistics for the latter year showing a total of 61,572,000 for these classes of poultry.

Foreign buyers visiting the British industries fair this year numbered 10,000, or twice as many as last year.

Alaska seal herd is estimated at more than 1,000,000 animals.

**Stop and Think!**

**It pays to "ROLL YOUR OWN" with**

It pays in pleasure—and pays in actual cash.

For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

**TURRET FINE CUT Cigarette Tobacco**

15¢ and 20¢ packages—also in ¼ lb. vacuum tins

## THE RHYMING OPTIMIST

By Allie Michale

### THE GIFT OF SONG

Just sometimes hope's rainbow is spanning  
The bridge we have built of our dreams;  
Just sometimes each bit of our planning  
Works out in accord with our scheme;  
Then how gladly we go  
Through a world all aglow  
Where the sunshine of happiness gleams!

Some seasons no wind is unkindly;  
Every seed that we plant comes to bloom,  
And the way we have trodden so blindly  
Leads us up from the shadows and gloom;  
Where we know life is bright  
And dim bliss in its wine-sweet perfume.

Just sometimes we give thanks at the ending  
Of hours, or sorrow, or doubt,  
And just sometimes we pause, command  
Our blessings, with hearts grown devout;

Then we taste of a joy  
Without dregs or alloy  
In the splendor that rings us about!

### Trying Out New Plan

Celery To Be Cultivated In Canada For Bermuda Growers

A plan to cultivate celery in Canada between June and October, transplant it in Bermuda and harvest it for export to Canada in February, has been made known by W. R. Evans, marketing adviser to the Bermuda Department of Agriculture. It is understood that an expert is coming to Montreal to plant the first seeds.

The scheme would advance the opening of celery shipments from Bermuda to Canada by two or three months.

**Relieve Asthma At Little Expense.**  
Thousands of asthmatics have been helped by spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply you.

### Honor the Dead

The graves of Redcoats killed in the battles of Concord and Lexington 157 years ago are not forgotten. Annual delegates of the British Naval and Military Veterans' Association of Massachusetts make a pilgrimage here to place wreaths on them.

Scotland has a safe-driving campaign.

Animal diseases cost farmers of England \$100,000,000 last year.

**Cried Himself to Sleep**  
All worn out... splitting headaches make life hideous every month. She took a tonic... Lydia E. Pinkham's Vegetable Compound relieved cramps.

### Painting Eiffel Tower

Engineers Think Structure May Become Menace In Twenty Years

The Eiffel Tower is forty-five tons heavier than it was last year. That is the amount of paint that forty-five painters are applying to the giant skeleton, still the third highest structure in the world. Only the Empire State and Chrysler Buildings in New York are taller.

Paris engineers went over the tower on an annual inspection and found it in good shape. Several engineers say that it can stand for another century before it will have been worn out by the elements, but most engineers agree that it may become a menace in twenty years.

By 1960, Eiffel Tower may have to be torn down or rebuilt, the process of rebuilding being such a costly and difficult task that Paris may easily lose the most visible feature of its skyline. The base of the great tower is stronger than its top and this is explained by the fact that the top sways in high winds and twists the metal.

The tower is being painted yellow and brown, which all Parisians agree is not pretty. Engineers say that paint of those two colors will increase the life of the tower. One American firm offered to paint the tower with aluminum paint just for the publicity, but this was opposed.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

**How "Milliner" Originated**  
Word Was Formerly "Milaner" Given To Milan Merchants

Milan, in Italy, was once the great centre of trade in silks, velvets, and other fine wearing apparel, and any merchant dealing in Milan goods was known as a Milaner. In addition to hats and gowns, gloves and stockings, the original Milaners also dealt in glass, cutlery and inland armor. As trade became more specialized, however, the Milaner, or milliner as he gradually became known, confined his attention to women's wear, and finally to hats alone.

**Teacher Is Handicapped**  
A silent teacher is a phenomenon in a Havana, Cuba, public school. She has voluntarily refrained from saying a word for five months. She was threatened with complete loss of her voice unless she gave her vocal organs a thorough rest. She does not know how much longer it will be necessary for her to remain dumb, but she is awaiting the doctor's verdict. Meanwhile she is writing her answers to questions.

**Shipyard To Close Down**  
Earle's shipbuilding yard at Hull, England, one of the oldest organizations of its kind on the east coast, is closing. During its 80 years of existence it has produced nearly 700 vessels of all classes, including 17 ships for the British navy, and a countless quantity of marine engineering.

Weaver's Hall in Louvain, Belgium, dates back to 1317 and contains a library with 200,000 volumes.

### Little Helps For This Week

"Come unto Me, all ye that labour and are heavy laden, and I will give you rest."—Matthew xii. 28.

Come, said Jesus' sacred voice, Come and make your path your choice; I will guide you to your home, Weary pilgrim, hither come.

Binners' come! for here is found Balm that flows for every wound, Peace that ever shall endure, Rest eternal, sacred, sure.

Anna Laestla Barbeud, Christ's Revelation to the weary and heavy laden is a call to begin life over again upon a new principle, "Watch My way of doing things." He says, "Follow me, take life as I take it; be meek and lowly, and you will find rest."—Henry Drummond.

### Britain's Fruit Bill

Increased By Nearly \$23,000,000 Last Year

The fruit bill of the United Kingdom went up by nearly \$23,000,000 last year, according to a report issued by the empire marketing board, with oranges for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second and bananas third, the three fruits accounting for nearly three-quarters of the fresh fruit eaten.

But the consumption fell off, mainly owing to the small home crops of apples, pears, plums and cherries. The domestic apple crop was 60 per cent. less than in the previous year.

**Buckwheat Destroys Weeds**  
Among the many uses of buckwheat as a field crop perhaps none is more important than its value as a weed destroyer, states crop specialists of the Dominion Experimental Farm. Its value in this connection arises from its quick germination and rapid growth. The fact that two crops of buckwheat can be raised during one year usually makes it particularly effective in the eradication of even such difficult weed problems as those presented by the Sow Thistle and Quack Grass.

Pressing down the handle of a new long-handled dust pan operates an attached brush to gather dust without requiring a user to stoop.

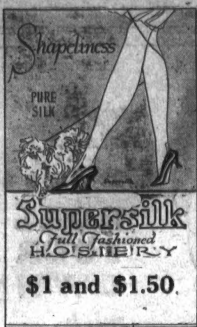

## Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved By Dr. Williams' Pink Pills.

**Working Every Day Now.**

I had to stop working and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Sciatica, Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all run-down or nervously exhausted people. Try them. At your druggist's, 50c. 25c.

**\$1 and \$1.50.**

# A. M. CAMPBELL'S

## Celebration at Bentley, July 19

Born: at the Bentley Hospital, to Mr. and Mrs. Thorkman, of Ekville, a daughter, Bork Sunday, July 4th. Mr. and Mrs. H. P. Hansen, of Bentley celebrated their silver anniversary last week. Their many friends in the community presented them with a beautiful chest of silver. Mr. Parker Kent, of Chilliwack, B.C. spent the week end at the home of Mr. and Mrs. L. R. Henry.

Mrs. W. Johnson, of Winfield, is a patient in the Bentley hospital, as a result of a serious accident caused by a horse falling on her. Miss Owen Haplin, R.N. is again nursing in the Bentley hospital.

Mr. Kenney, of the Bank of Montreal staff spent the week end in Edmonton.

At the meeting of the Board of Trade last week, the following officers were elected: Geo. A. Graham; Pres. C. Summers, Sec. Treas.

It was decided to hold a picnic at Bentley on July 19th. Mrs. Moore was presented with a purse of money as a token of esteem, during his 3 years in Bentley. The Board of Trade voted to support the club. Mr. Beacom was welcomed to our deliberations by the chair.

Doll contest final results. The five first winners were as follows:

1st, Jean Marshall . . . 8015 votes  
2nd, June Slaughter . . . 7895 votes  
3rd, Marg. Pringle . . . 4745 votes  
4th, Maxine Wetzel . . . 4650 votes  
5th, Marie Hansen . . . 4341 votes

The other 15 candidates drew prizes also, but space will not permit us to name the other winners. The winners wish to thank their many friends for placing their votes with them.

The excavation is completed at the new community hospital and the new deep well is being drilled at the present time. A car load of lumber is expected this week, and the construction will start immediately.

Dr. Henry is very proud, of his Sarah Bernhardt Paucy. The beautiful plant has 30 buds and blossoms, and all those interested in flowers should view this beautiful plant.

The rainfall in Bentley over the week end was .72 inches. The crops are looking wonderful.

Large crowds are attending the picture shows (talkies) in Bentley every other week.

W. B. Cairns, formerly Manager of the Bank of Montreal at Bentley is spending his holidays at Brown's Landing.

The Stephenson and Easton S.D. had a joint picnic at Gull Lake on June 30th. The time was taken up with all kinds of water and land sports.

The Rev. J. C. McLennan, of Armo, Alta., preached his first sermon in Bentley on Sunday, July 3rd.

There was a large turnout to welcome Mr. McLennan to Bentley. The Ladies' Aid are renovating the Manse.

The big fish caught by Bud Dameron is on exhibition at the present time at the office of Dr. Henry. The fish weighs 17 lbs. 4 oz. and is 48 inches long. The Bentley fish and game society offer a prize of a \$5 gold piece to anyone catching a larger fish in Gull Lake. (Fish must be brought to Bentley and measured. See posters of the Big Barbecue at Bentley on July 19th.)

ITS EVIDENTLY JUST AN OLD KLAN KUSTOM Chicago, July 4—Six psychiatrists passed on the mental condition of Edward Y. Clark yesterday and agreed the Imperial Kluge of the Ku Klux Klan, should be placed in an institution.

They could not agree, however, on whether he was legally insane.

Dr. Clarence O. Neymann ventured the opinion that Clarke ought to be in prison. This happened when Leonard Grossman, attorney for Clarke, asked a hypothetical question in the insanity hearing before Judge J. G. Van Keuren of the Psychopathic Court.

Attorney Grossman asked: "What would you think of a man who, without money, employed twenty stenographers, rented the whole floor of an office building, then talked of buying the building? What would you think if the same man spoke of building five 'mystic shrines,' one on a mountain top?"

"I would think he was a crook," said Dr. Neymann bluntly. "He ought to be in an institution but not an institution for the insane. He ought to be in jail."

Clarke must recently have been the promoter of the "mystic order," through which he proposed to save the nation by obtaining numbers at \$10 to \$300 each. His case was continued for another week and Clarke said he would remain in the psychopathic ward meanwhile.

Dr. H. I. Davis and Dr. James Whitey Hall sat as a commission with Judge Van Keuren at the hearing. Dr. Francis J. Gerty, James J. Gill, V. G. Urse and Neymann testified.

All agreed he was sane, excepting Dr. Hall, who said he thought Clarke a paranoiac. Because of Dr. Hall's dissenting opinion it was decided Dr. Clarke will be given another hearing next Thursday. On that occasion Drs. A. S. Harfield and F. A. Dulak, also psychiatrists, will sit as the commission with Judge Van Keuren.

In Alberta the fee is \$13.00 for the festive suckers.

HOGS WANTED I prefer to get them on Thursdays when possible at C.P.R. Stockyards. W. P. Puffer. 4p

### SWIMMERS ARE WARNED

#### NOT TO TAKE CHANCES

Here are a few don'ts for those who enjoy summer recreation.

This is the season of drownings. Already this summer several persons have lost their lives while swimming.

Records compiled by insurance companies prove conclusively that "taking chances" is one of the main causes of death by drowning. Don't take chances!

Read and remember the following don'ts.

Don't go swimming alone or at night.

Don't overestimate your strength. Because you have been able to swim a certain distance several times that day, does not mean that you will be able to do it again.

Never swim across lakes or rivers or from headland to island, etc., or in unknown or dangerous waters, unless accompanied by a boat and a strong, level-headed companion trained in life-saving. A sudden channel of icy water, fatigue, undertow, cross current or treacherous tide may carry you to your death.

At the first opportunity learn how to rescue drowning persons without unduly endangering your life and learn how to administer artificial respiration.

Do not attempt to swim to a drowning person's rescue in rough water unless no other help is immediately at hand and you are confident you are capable of effecting a rescue without sacrificing the drowning person's as well as your own life.

### The New Swim Suits

We have just received a new shipment of Bathing Suits for Men and Boys, and they are good to look at. We have priced them very low. They are the famous lines of Jantzen's and Woods, recommended by swimmers all over the continent.

### Get Your Summer Suit Now

As usual we have the very latest patterns and colors for your new summer suit, which we will have made to your measure for the price you have been paying for a ready-made. Come in and look over our samples. We have had very wide experience in catering to men who want the best; we know how to take your measure and have your clothes made to suit your individual requirements. Your money back if you are not satisfied. But we know you will be—we have dressed thousands of satisfied customers.

### Your Straw Hat Is Here

We have a nice line of Summer Straws in all the latest shapes and band colorings for young men. The prices this year are lower than you have ever seen them, and the outlook for a hot summer will give you the urge to get one now. You can get a work hat or dress hat for 20c. up to \$1.50

### Now We Clean Out Oddments

Our sale has left a lot of odds and ends throughout the store; broken lines and odd sizes, which we are going to clear out regardless of cost. These odds and ends are from our regular stock, and we are only asking a fraction of their former selling price—we are going to get rid of them. We are busy unpacking new goods for Spring and Summer and having our store thoroughly remodelled. In a short time we will have for your convenience the cleanest and most up-to-date line of men's furnishings in Alberta.

# DAVID HAY Men's Wear Lacombe

**Cleaning, Pressing and Repairing, Promptly Done.**

If possible before starting to a rescue, call to someone to get a rope, or a boat. If you are dressed, remove shoes, coat and trousers—an extra second or two removing clothing is time well spent.

Don't swim for at least two hours after eating and never swim beyond your depth in very cold water. Severe indigestion or muscle cramp may result. Never drink cold beverages immediately before going swimming.

Skylarking in a boat is dangerous. Learn how to enter and leave boats or canoes and how to manage them properly. Beware of sudden squalls and storms, strong winds and choppy sea.

Don't 'duck' or tease your friends who are not as good swimmers as yourself. This may cause a panic mind which in an emergency may result in their death.

Teach your friends who are poor swimmers to go bathing in pairs (preferably with someone else who is a good swimmer.) to stay in shallow water, to beware of hidden holes and sudden drops in sea shelving, and to beware of heavy breakers and undertows.

Never dive in unknown, shallow or rocky waters. Even in clear waters remember that "a deep dive is a dangerous dive."

Don't TAKE CHANCES!
